ABOUT US

Incorporated in 1994, Afrisun Marketing (Pvt) Ltd has been trading in different commodities for many years.

The company has been supplying the local market with office furniture under the Only Italian brand since 2000, priding itself on offering a comprehensive range of office furniture and seating. We have been the first company in Zimbabwe to introduce the concept of 'ergonomics' in chairs and in desks, providing comfort and safety while in no way compromising on high quality design.

Our team keeps its eye on the international market through the major office furniture exhibitions held around the world, ensuring we stay one step ahead of our competitors and our products are abreast of global trends.

In 2018 the company opened a 500 square metre show room along Borrowdale Road, a site which, in terms of its size, lighting and modern design, creates the perfect environment to showcase our products.

Our clientele has grown consistently since we began, and our reward has been our customer satisfaction, reflected in the amount of return business we experience from around the country.

Over the past three years and as a means of further expanding our business, we have selected several local manufacturers with whom to work, passing on technical information to develop some of our lines in desks and couches. With constant supervision on our part in terms of maintaining standards of quality and consistency, we can now offer several locally produced products. We are proud to say we have contributed to increasing local skills and generating a substantial volume of business in the local industry.
